

# Cantina Pro

## UTILITY + DESIGN

**B**ar and prep sinks are playing a bigger role in today's kitchens, and Native Trails is ready with a new, super-functional design that is up to the task in every which way. The Cantina Pro is perfectly proportioned with outer dimensions measuring 24" x 15" x 7.5" and includes a fixed prep deck for added utility and design. The deck features ridges on its gently sloping surface to help with draining, making Cantina Pro particularly user friendly in a bar. The additional surface space also highlights the rich, textural details of the sink's hand-hammered copper. A grid is available that fits neatly on the floor of the sink, offering added protection for the bottom surface and a cushion for fragile dishes and glassware.

The entire sink is handcrafted of recycled copper and is available in two finishes: Antique and Brushed Nickel. The Antique option has the added benefit of copper's natural anti-bacterial qualities, which kill more than 99.9% of active bacteria.

Native Trails is an industry leader in the production of artisan crafted sinks and today is featured in over 1100 showrooms in the US and Canada. Cantina Pro will be available in June. For additional information, please visit [www.nativetrails.net](http://www.nativetrails.net).
