San Luis Obispo, CA – September 2005. Everyone needs to relax and Native Trails is giving you that chance with their new Aurora Tub. This luxurious copper tub is the perfect way to unwind from a busy day.

Offered in Antique finish, the tub stretches 72 inches long and 32 inches high (outside dimensions). Not only is this tub a great way to relax but it makes a wonderful focal point for any bathroom. It coordinates wonderfully with Native Trails' handcrafted copper mirrors and basins, creating an old world ambiance.

Every hammer mark left on the Aurora Tub highlights the amazing capability of the artisans. Native Trails' copper basins and tubs are handcrafted using 100% recycled copper.

Native Trails' extensive line of hand hammered copper basins, tubs and accessories is sold exclusively through kitchen and bath showrooms nationwide. Native Trails is known for its high standards of quality and craftsmanship, superior customer service, and unusually short lead times.
